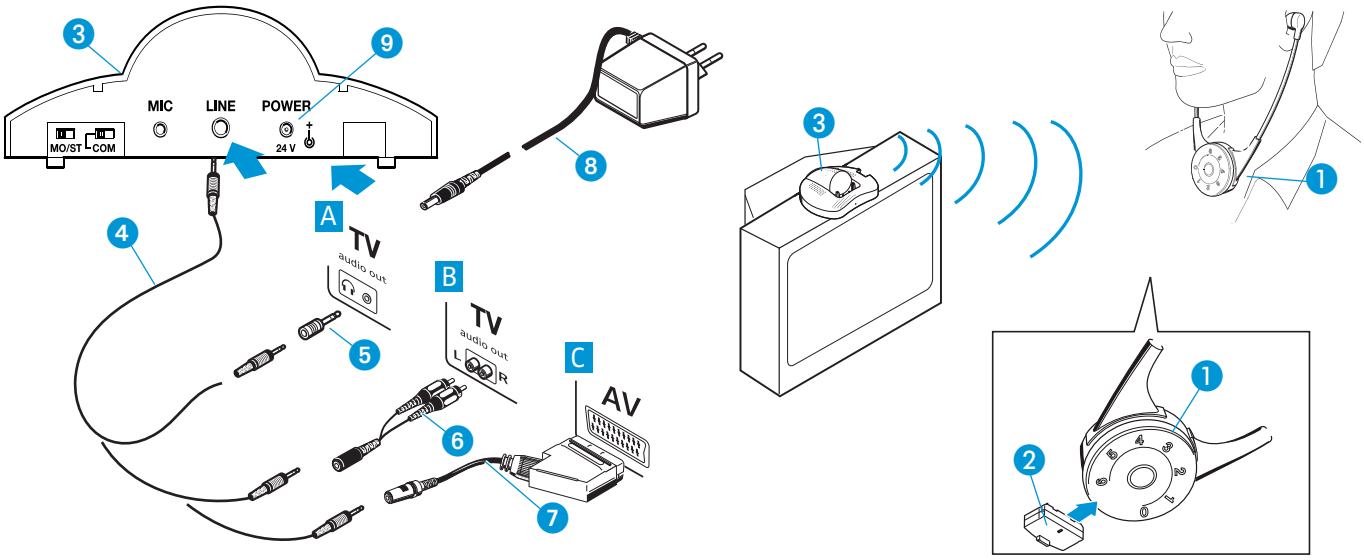
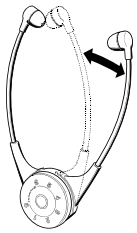
Quick instructions
Set 810



Connecting the system components

- Plug in one end of the connecting cable 4 to the socket on your sound source (e.g. television). If necessary, use one of the adapters 5, 6 (not included) or 7. Plug in the other end of the connecting cable 4 to the socket LINE 5 on the transmitter.
- Connect the mains unit 8 to the transmitter 9 and to the mains.
- Place the receiver into the transmitter's charging compartment 3.
- Before you use the rechargeable battery 2 for the first time, charge it until the LED lights up green.
- Adjust the volume on your sound source (TV Set) to a sufficient, medium level.

Switching on and using the stethoset receiver



- The receiver automatically switches on when you pull the earbows apart. First adjust the volume to a low level. This protects your hearing from damage. Then put the receiver on and adjust the volume to a comfortable level 1.
- If you cannot hear anything through the receiver, increase the volume on your sound source.

Switching the stethoset receiver off

- The receiver automatically switches off when you take it off.

Charging the stethoset reciever

- Place the receiver into the transmitter's charging compartment 3 without exerting too much pressure. With a fully charged battery, the operating time is approx. 4 hours.

For details on the use of the Set 810, please refer to the enclosed operating instructions.
